Triple Aim

The IHI Triple Aim

The “Triple Aim” is an approach to healthcare that focuses on three objectives: improving the patient experience, improving population health, and reducing health care costs. The [Institute for Healthcare Improvement](#) developed this framework in 2008 as a means of optimizing health system performance.

The following is a list of recent literature on this topic. To read the full article, click the linked title. If you would like additional information, please contact any Werner Medical Library team member.

- **Aboumatar HJ. (2015).** [Promising practices for achieving patient-centered hospital care: A national study of high-performing US hospitals](#). *Medical Care*, 53(9), 758–767.
- **AHA. (2015).** [Issue brief: Zeroing in on the Triple Aim](#). Chicago, IL: American Hospital Association.
- **Billingsley R. (2015).** [Working together to improve the patient experience](#). *Nursing Management*, 46(4), 11-3.
- **Block DJ. (2014).** [Revisiting the Triple Aim--are we any closer to integrated health care?](#) *Physician Executive*, 40(1), 40-3.
