JULY 2013

PATIENT ENGAGEMENT

The Center for Advancing Health defines patient engagement as “actions individuals must take to obtain the greatest benefit from health care services available to them.” Clinicians and patients need to work in a partnership toward the common goal of improved health. Patients need knowledge, skills and emotional support to actively engage in their own health care.

If you would like copies of any of these articles, or if you would like further information on this or any topic, please contact any library team member.
