Rochester General Hospital Edition

Adult Vaccination

While vaccination is frequently required for children and adolescents, no such mandate exists for adult immunization. The CDC estimates that over 40,000 adults in the United States die each year of vaccine-preventable diseases with billions of dollars spent annually on the care and treatment of preventable illnesses.

If you would like copies of any of these articles, or if you would like further information on this or any topic, please contact any Library staff member.
