CAUTI (Catheter Associated Urinary Tract Infection)

CAUTI is one of the most frequently encountered infections today, accounting for 40% of all health care-associated infections. Changes in reimbursement policies have focused attention on the use of indwelling catheters in inpatients as well as their role in hospital-acquired urinary tract infections.

UPDATE

Last month our newsletter explored economic aspects of hospital-acquired infections.

Since then, the Centers for Disease Control & Prevention (CDC) have issued *Guidelines for the Prevention of Intravascular Catheter-Related Infections*.

Please contact the Library for a copy of this latest guideline.
