HAND HYGIENE

Each year in U.S. hospitals there are approximately 1.7 million health care-associated infections and nearly 100,000 associated deaths. Hand hygiene among health care workers plays a central role in preventing the transmission of infectious agents. If you would like copies of any of these articles, or if you would like further information on this topic, please contact any library staff member.

Alspach G., "Protecting your patients, colleagues, family from infection: first wash." *Critical Care Nurse*, 28(1):7-12, 2008 Feb.

Andersen E., "Soap opera -- myths versus facts regarding hand hygiene." *AAOHN Journal*, 55(7):261-2, 2007 Jul.

Backman C. Zoutman DE. Marck PB., "An integrative review of the current evidence on the relationship between hand hygiene interventions and the incidence of health care-associated infections." *American Journal of Infection Control*, 36(5):333-48, 2008 Jun.
