## Rochester General Hospital Edition

May 2008

### SMOKING CESSATION

The World Health Organization estimated that 4.9 million people die annually as a result of tobacco-related diseases. Cigarette smoking remains the leading preventable cause of death, accounting for approximately 1 of every 5 deaths each year. An estimated, 20.8% of all adults (45.3 million people) smoke cigarettes in the United States. If you would like copies of any of these articles, or if you would like further information on this topic, please contact any library staff member
